

## Functional wellness jacket

promodoro® is currently presenting a high-quality softshell jacket for him and her for the coming autumn/winter season 2011: the *Women's & Men's Hoody Softshell Jacket*. Thanks to its functional upper layer the jacket is wind and water-proof as well as being breathable. The interior of the jacket is made of bonded fleece, which ensures high wearing comfort and has a warming effect, is however also breathable so that any body moisture is transmitted directly to the outside. With its sporty cut and bi-elastic softshell material made of 260g/m<sup>2</sup> polyester, the jacket doesn't just cut a clean figure for leisure-time activities, but is also suitable for promotionwear and corporate fashion purposes. A continuous, water-proof zip with a reflective zipper, a chin protection and an adjustable hood with an elastic drawstring provide reliable protection in bad weather. Two large insert pockets with water-proof zips warm the hands and keep the wearer's mobile phone and wallet dry.

The back of the softshell jacket is extra long, so that the back and waist are always protected even in the event of intense physical movements.

Fitted with Velcro fasteners the width of the sleeves can be adjusted so the wrists and lower arms are protected.

The *Hoody Softshell-Jacket* is available in classic black or elegant grey in the sizes XS to XXL for

ladies and in the sizes S to XXXL for men and offers the ideal background for attractive brandings.
